

Eurotech Air Systems is one of the leading air conditioning organizations for manufacturing and installation of air-conditioning and ventilation systems offering services to organizations of all nature and size. The company has the expertise to design, supply, install and commission complete range of HVAC and Refrigeration Systems to meet particular specification of our clients.

Eurotech today is one of the leading company manufacturing: Air handing units, wide range of extruded aluminum grilles, anti smudge removable core diffusers, Slot diffusers, CBRI approved Fire Dampers, Kitchen Hoods, Air washer, Tanks, and sheet metal products.

Eurotech caters to the HVAC and refrigeration needs of diverse segments in the market. The company focuses on detailed engineering for obtaining best of solutions to our clients.

Particular areas of Specialty:

- Commercial and Industrial HVAC Systems.
- Process cooling and clean rooms.
- Ventilation and Exhaust Air Systems.
- Pharma Applications.
- VRF systems.

Eurotech has the resume to design, fabricate, and install your industrial ventilation or air pollution control system. Whether it is building pressurization, conditioned supply air, or emission control, we can provide the solution.

Custom Solutions for Your Industrial Ventilation System

Differentiation: While our competition offers only a part of the solution, we can offer a turnkey system. We design, fabricate, and install all of the components, supports, and equipment – saving the customer in mark-ups and paperwork.

Our designs are industry tested and proved. Not only do we follow the required and suggested practices of **OSHA (Occupational Safety and Health Administration)** and **ACGIH (American Conference of Governmental Industrial Hygienists)** we also apply Eurotech experience to customize your solution. Here are a few examples:

- Process Mist Control: Machine connections, duct, and mist collectors
- Process Dust/Fume Control: Hooding, duct, and control devices including scrubbers
- Air Moving Systems: Supply and exhaust fans
- Supply Air Systems: Air handlers, conditioned air, return air, diffusers
- Hooding: Canopy, side-draft, articulating, custom hoods
- Duct: Heavy gauge and light gauge, round and rectangular, fittings, elbows, transitions
- Stacks: Self-supporting, No-loss, weather caps
- Dampers: Butterfly (wafer), cut-off, half cut-off, blast gate

The company has well qualified trained service engineers and technicians to back our installations and provide effective after sales service to our customers.

Eurotech enjoys a preeminent status in the HVAC industry. In most of the major projects Eurotech is given preference over competitors by the leading consultants. It is safe to add that Eurotech products are consistently specified as standard equipment. All this is attributed to our design, innovation, engineering, cost effective and timely execution and after sales service capabilities to cater projects from small to big.

We assure you of our best services at all times.
